**Orienteering
 Surprise**

Traditional Mlynko - Nicholas surprise in selected categories from MW-16 to MW40-. The track in these categories will contain "self-choice" with 3 variants A, B, C from start to nodal control (marked as a triangle in a circle). From there, the competitor continues on the track in the given order of control points to the finish line. Procedure: 1 minute before the start, the competitor takes the map of the relevant category, chooses variant A, B, or C. The controls are marked 1(A), 1(B), 1(C), 2(A), 2(B), .,2(B).....and starts. If he does not have time to make a decision before the start, he can also think on the track, but his time is running out. If he chooses 1(B), he continues to 2(B). When he reaches the nodal control, e.g. 3, (triangle in a ring), continues in the specified order 4,5,6...to the finish line. An example of the track is on the map:
